

Closing Application Context

- ▶ Standalone Non-Web Applications

- ▶ Register Shutdown hook by calling `ConfigurableApplicationContext#registerShutdownHook` - Recommended way
 - ▶ Call `ConfigurableApplicationContext#close`

- ▶ Web Application

- ▶ `ContextLoaderListener` will automatically close context when web container will stop web application

- ▶ Spring Boot

- ▶ Application Context will be automatically closed
 - ▶ Shutdown hook will be automatically registered
 - ▶ `ContextLoaderListener` applies to Spring Boot Web Applications as well
